

DUALSCOPE MPOR

The DUALSCOPE MPOR film gage allows quick and easy measurements of coatings thickness on ferrous and non-ferrous substrates. The instrument automatically identifies the kind of substrate and selects the appropriate test method accordingly.

The instrument is designed for one-hand operation. An integrated spring guarantees a constant pressure of the probe to the sample's surface. The instrument comes with an USB interface for bi-directional data transmission to the Data Center Software. Data can be exported to Excel spreadsheet.

DUALSCOPE MPOR:

- Compact size instrument
- Illuminated display
- Statistic function, min., max., mean, Std. dev.
- Two displays for easy view for measurement results
- Magnetic-induction Fe-sensor particularly suitable for the automotive industry
- Eddy current method for non-ferrous substrates
- Large memory stores up to 10.000 values
- Indicator LED for pass/fail
- Conductivity compensation for measurements on aluminum alloys
- Continuous scan of measurement surface
- Easy to use menu navigation
- Automatic turning display
- Two special measuring modes to conform to IMO PSPC (90/10 rule) and SSPC-PA2
