# IBH Link UA

The compact OPC UA server  
for S5- and S7-PLC

- ▶ OPC UA Server for easy connection to MES, ERP and SAP systems and visualizations
- ▶ OPC UA Client functions for S7 PLC to connect to external OPC UA server systems
- ▶ 4 Ethernet Ports with Firewall → clean separation of machine and supervision level
- ▶ Scalable security levels through exchange of digitally signed certificates
- ▶ Connection to S7-PLCs over S7 TCP/IP or IBH Link S7++
- ▶ Connection to S5-PLCs over IBH Link S5++
- ▶ Comfortable configuration with the free of charge IBH OPC UA Editor, Siemens STEP7 or the TIA Portal
- ▶ Handles up to 31 projects simultaneously
- ▶ Administration via web browser
- ▶ Historical Data
- ▶ Alarms & Conditions
- ▶ MQTT implementation
- ▶ AWS Greengrass / AWS IoT implementation
- ▶ Azure IoT Hub implementation
- ▶ IBM Watson IoT implementation

[www.ibhsoftec.com/IBH-Link-UA-Eng](http://www.ibhsoftec.com/IBH-Link-UA-Eng)

**Product number #3200**

The IBH Link UA is an OPC UA Server/Client module with integrated firewall for the SIMATIC S5, S7-200, S7-300, S7-400, S7-1200, S7-1500 and LOGO! (Ethernet versions) PLC. It is a compact unit for DIN rail mount with four Ethernet ports and a 24V power supply.

The configuration of the IBH Link UA is made with the free IBH OPC Editor, the Original Siemens STEP7 or the TIA Portal. There is no need for other special software. Thus, the IBH Link UA can be seamlessly integrated into the PLC

project. The IBH Link UA can handle up to 31 STEP7 and / or TIA projects simultaneously.

The definition of the variables will be transferred from the programming tool to the IBH Link UA via Ethernet. The attributes of the variables (f.i. write protection or limits) will be defined directly within the PLC project. This allows symbolic access to variables and data block structures.

The communication to the S5 and S7 PLC is established over Ethernet. If the PLC has no Ethernet port, our well known gateways IBH Link S7++ or IBH Link S5++ can be used. There are three Ethernet Ports for machine level on the IBH Link UA and one Ethernet Port for the supervision level. On the supervision level only OPC access is allowed. Between both levels there is a firewall integrated. The configuration of the Ethernet ports can be made using a standard web browser.

OPC Client functions can also be called directly within the PLC program to allow communication with PLCs of other manufacturers via OPC UA. Therefore, handling blocks in STL are provided, which use PUT/GET functions for the communication with the IBH Link UA.

# IBH OPC UA IoT 2040

- ▶ OPC UA Server for easy connection to MES, ERP and SAP systems & visualizations
- ▶ OPC UA Client functions for data exchange between different OPC UA Servers
- ▶ Integrated SoftPLC for data preprocessing
- ▶ 2 Ethernet Ports with Firewall for clean separation of machine and supervision level
- ▶ Scalable security levels through exchange of digitally signed certificates
- ▶ Connection to S7-PLCs over S7 TCP/IP or IBH Link S7++
- ▶ Connection to S5-PLCs over IBH Link S5++
- ▶ Comfortable configuration with the free of charge IBH OPC UA Editor, Siemens STEP7 or the TIA Portal
- ▶ Handles up to 31 projects simultaneously
- ▶ Administration via web browser
- ▶ Historical Data
- ▶ Alarms & Conditions
- ▶ MQTT implementation
- ▶ AWS Greengrass / AWS IoT implementation
- ▶ Azure IoT Hub implementation
- ▶ IBM Watson IoT implementation

[www.ibhsofttec.com/IBH-OPC-UA-iot2040-Eng](http://www.ibhsofttec.com/IBH-OPC-UA-iot2040-Eng)

**Product number #3206**

A microSD card with the OPC UA server/client with IBHsoftec fire-wall is available for the Siemens Gateway IoT2040 (6ES7647-0AA-00-1YA2). By simply plugging the preconfigured microSD card from IBHsoftec, the IoT2040 becomes an OPC UA server/client for Siemens PLCs. This solution integrates SIMATIC S5, S7-200, S7-300, S7-400, S7-1200, S7-1500 and Logo! (Ethernet versions) Controllers into the OPC UA world.

The configuration of the IBH OPC UA Server/Client is made with the free IBH OPC Editor, the Original Siemens STEP7 or the TIA Portal. There is no need for other special software. Thus, the OPC UA Server/Client can be seamlessly integrated into the PLC project.

The communication to the S5 and S7 PLC is established over Ethernet. If the PLC has no Ethernet port, our well known gateways IBH Link S7++ or IBH Link S5++ can be used. There is one Ethernet Port for machine level and one Ethernet Port for the supervision level. On the supervision level only OPC access is allowed. Between both levels there is a firewall integrated. The configuration of the Ethernet ports can be made using a standard web browser.

One of the advantages of the IBHsoftec solution is, that it supports Client and Server functions simultaneously. This allows data exchange between different OPC UA Servers.

# IBH OPC UA Server/Client

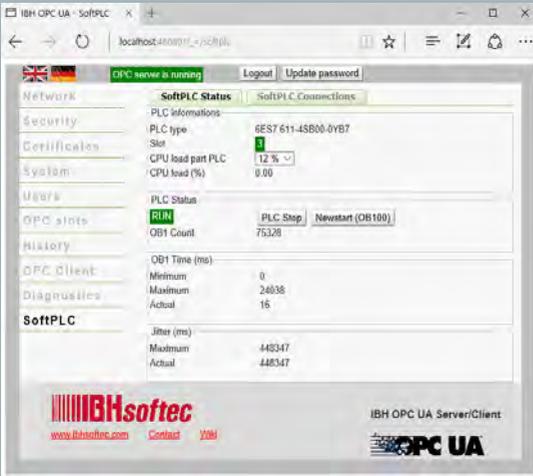

- ▶ OPC UA Server for easy connection to MES, ERP and SAP systems and visualizations
- ▶ OPC UA Client functions data exchange between different OPC UA Servers
- ▶ Integrated SoftPLC for data preprocessing
- ▶ Scalable security levels through exchange of digitally signed certificates
- ▶ Connection to S7-PLCs over S7 TCP/IP or IBH Link S7++
- ▶ Connection to S5-PLCs over IBH Link S5++
- ▶ Comfortable configuration with the free of charge IBH OPC UA Editor, Siemens STEP7 or the TIA Portal
- ▶ Handles up to 31 projects simultaneously
- ▶ Administration via web browser
- ▶ Historical Data
- ▶ Runs on Windows XP, Vista, Windows 7, Windows 8, Windows 10
- ▶ Alarms & Conditions

[www.ibhsoftec.com/IBH-OPC-UA-Server-Eng](http://www.ibhsoftec.com/IBH-OPC-UA-Server-Eng)

## Product number #1180

OPC UA Server/Client for the SIMATIC S5, S7-200, S7-300, S7-400, S7-1200, S7-1500 and LOGO! (Ethernet versions) PLC.

The configuration of the IBH OPC UA Server/Client is made with the free IBH OPC Editor, the Original Siemens STEP7 or the TIA Portal. There is no need for other special software. Thus, the IBH OPC UA Server/Client can be seamlessly integrated into the PLC project. The IBH OPC UA Server/Client can handle up to 31 STEP7 and / or TIA projects simultaneously.

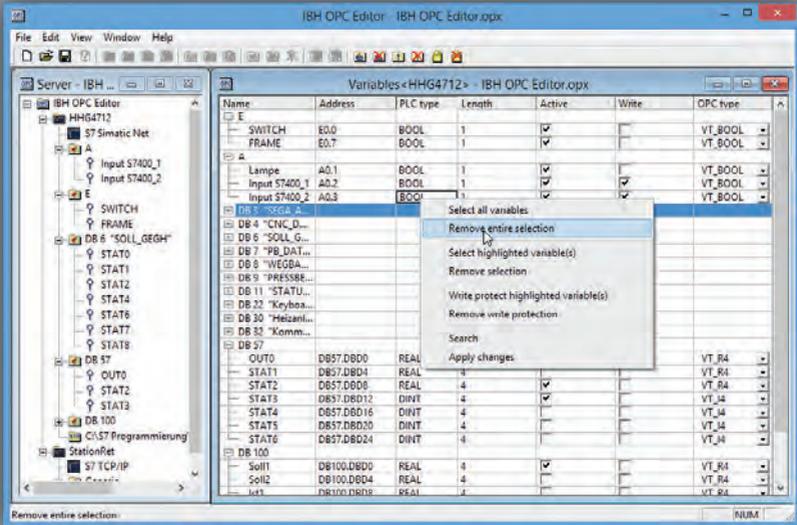

The definition of the variables will be transferred from the programming tool to the IBH OPC UA Server/Client via Ethernet. The attributes of the variables (f.i. write protection or limits) will be defined directly within the PLC project. This allows symbolic access to variables and data block structures.

The communication to the S5 and S7 PLC is established over Ethernet. If the PLC has no Ethernet port, our well known gateways IBH Link S7++ or IBH Link S5++ can be used.

One of the advantages of the solution from IBHsoftec is, that the IBH OPC UA supports Client and Server functions simultaneously. This allows data exchange between different OPC UA Servers. For example control systems and other equipment with OPC UA servers from different manufacturers can exchange data with each other. The configuration of the client functions can be made using a standard web browser.

# OPC Server

Product number #1150

## IBH OPC Server: easy automation

With the IBH OPC Server a visualization application can be linked to any SIMATIC PLC (including Ethernet enabled LOGO!) and IBHsoftec SoftPLCs.

- ▶ Windows® 10 support
- ▶ Reach your goals with just a few clicks
- ▶ Adopt the symbolic addressing of your PLC-program
- ▶ Many different communications like TCP/IP, H1, serial, USB possible ...
- ▶ Full featured demo version available for free

[www.ibhsoftec.com/IBH-OPC-Server-Eng](http://www.ibhsoftec.com/IBH-OPC-Server-Eng)

# IBH Link S5++

Product number #20284

Cost efficient Ethernet-PLC-Gateway for the communication between PC and SIMATIC S5 PLC.

- ▶ Standard-TCP/IP protocol
- ▶ Direct access with S5 for Windows®
- ▶ Driver for STEP 5 from V7.16 included
- ▶ Access of S7-HMI-Devices via RFC1006
- ▶ Programming functionalities for HMI-Applications
- ▶ API for HMI-Applications included
- ▶ Configuration via USB possible
- ▶ FETCH/WRITE protocol supported

The IBH Link S7++ is a gateway from Ethernet to MPI/PROFIBUS (Class 2 Master), available inside the connector housing, or for DIN rail mount.

[www.ibhsoftec.com/IBH-Link-S7-PP-Eng](http://www.ibhsoftec.com/IBH-Link-S7-PP-Eng)

**Product number S7++ #20266**  
**Product number S7++ HS #20268**

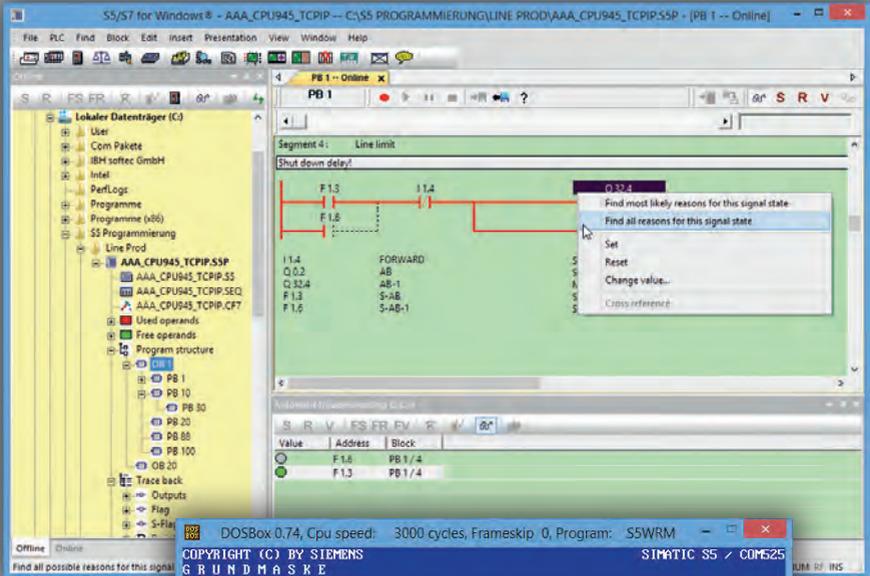

## **Cost efficient Ethernet-PROFIBUS-Gateway for programming, drive configuration, for communication between PC and Siemens PLCs, inter-PLC communication and FDT applications**

- ▶ CommDTM for FDT container available for free
- ▶ Master Class 2 for acyclic services (DPV1)
- ▶ Read the diagnostic buffer via web browser
- ▶ PROFIBUS-Slave Diagnostic
- ▶ Online to SIMATIC S5 via SINEC L2
- ▶ Configuration via web browser
- ▶ IPv6 support
- ▶ Configuration via NetPro
- ▶ Windows® 10 support
- ▶ STEP 7 (32-Bit and 64-Bit) support
- ▶ Time synchronisation
- ▶ PROFIBUS diagnostic
- ▶ Setting of slave Parameter via DPV1
- ▶ Data set routing
- ▶ Drive configuration
- ▶ Integration within the TIA portal
- ▶ DHCP
- ▶ S7 routing via RFC1006
- ▶ Fetch/Write via RFC1006
- ▶ PLC-PLC communication
- ▶ Process data access with other PLC, Windows and Linux
- ▶ Support for STARTER, S7-PCT, PDM, LifeList
- ▶ Setting and diagnostic of field devices with TCI
- ▶ Up to 16 parallel PC connections at the same time
- ▶ Up to 32 parallel MPI / DP connections at the same time
- ▶ Automatic bus profile detection
- ▶ PG-connector
- ▶ RJ45 Ethernet (10/100) with autonegotiation
- ▶ Diagnostic LEDs
- ▶ Power supply from the MPI / DP interface (S7++ only)
- ▶ External 24V supply possible

# S5 for Windows®

[www.ibhsoftec.com/S5W-Eng](http://www.ibhsoftec.com/S5W-Eng)

## **Programming tool designed for programming the Siemens PLC family SIMATIC S5 with STEP 5**

- ▶ Windows® 10 support
- ▶ Can be combined with S7 for Windows® or runs stand-alone
- ▶ Multiple segments can be shown in the status display
- ▶ Statement List (STL), Function Block Diagram (SFC) and Ladder Diagram (LAD) presentations
- ▶ Projects are compatible to the original Siemens programming tool
- ▶ STEP5-projects can be edited directly without im-/export
- ▶ Integrated S5-Simulation
- ▶ Comfortable block comparison (BlockDiff)
- ▶ Emulator to call original COM-Packages
- ▶ Online on SIMATIC S5 via SINEC L2 with the IBH Link S7++
- ▶ Graphical Step Sequence Programming
- ▶ Fully automated debugging without program adaption
- ▶ Oscilloscope feature
- ▶ OsciCAM®: analyze motion processes through synchronisation of previously recorded videos and process signals
- ▶ Statusrecorder: dynamic procedures can be explored by subsequently analysis of the block status frame by frame
- ▶ LogView: graphical representation and synchronisation of measurements
- ▶ IntelliSense: intelligent input assistance
- ▶ Driver for Siemens USB S5/S7 Prommer available

## **Programming tool for the SIMATIC S7-300 and S7-400 series**

- ▶ Windows® 10 support
- ▶ Can be combined with S5 for Windows® or runs stand-alone
- ▶ Complete S7 instruction set implemented in the presentations Statement List (STL), Function Block Diagram (SFC) and Ladder Diagram (LAD)
- ▶ Status of variable views and symbolic tables
- ▶ STEP7-projects can be edited directly without im-/export
- ▶ Conversion from S5- to S7-programs
- ▶ Integrated S7-Simulation
- ▶ Comfortable block comparison (BlockDiff)
- ▶ Fully automated debugging without program adaption
- ▶ Oscilloscope feature
- ▶ OsciCAM®: analyze motion processes through synchronisation of previously recorded videos and process signals
- ▶ Statusrecorder: dynamic procedures can be explored by subsequently analysis of the block status frame by frame
- ▶ LogView: graphical representation and synchronisation of measurements
- ▶ IntelliSense: intelligent input assistance
- ▶ Hardware configuration
- ▶ Hardware catalogue can be extended with GSD-files
- ▶ Hardware catalogue can be updated over internet
- ▶ Driver for Siemens USB S5/S7 Prommer available

# SoftPLC S7-315/S7-416

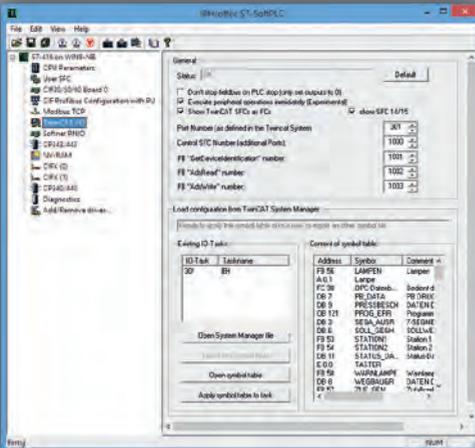

[www.ibhsofttec.com/SoftPLC-416-Eng](http://www.ibhsofttec.com/SoftPLC-416-Eng)

**Product number S7-315 #1300**  
**Product number S7-416 #1302**

## SoftPLC S7

The IBH SoftPLC S7-315 / S7-416 executes a program in the same manner as a hardware PLC. The advantage of executing a PLC program this way is, that the PLC status can be displayed in real time. Since the Soft PLC behaves like an original SIMATIC PLC, the programming tools S7 for Windows® and STEP 7 can be used. The SoftPLC allows process monitoring, operation and control from one hardware unit. The use of the Soft-PLC is especially useful if a PC for data collection, process visualization, programming, or any other reason needs to be used anyway. A SoftPLC solution eliminates the need for a hardware PLC and the corresponding communication processor.

### Supported Fieldbussystems

Fieldbus card/-system	Hilscher	Beckhoff
Lightbus	–	✓
PROFIBUS	✓	✓
PROFINET I/O	✓	–
Interbus	✓	✓
DeviceNet	✓	✓

EtherCAT	✓	✓

# SoftPLC S7-315/S7-416

The screenshot displays the IBHsoftec S7-SoftPLC software interface. The main window shows the configuration for a PLC (S7-416 on WIN8-NB). The left sidebar lists various hardware components like CPU Parameters, User SFC, and communication modules. The main area shows PLC-Program settings, including cycle times (28806), jiter (2), and memory usage. A secondary window shows the 'General' settings for the PLC, including status (OK), execution options, and a symbol table for IO tasks.

**General Settings:**

- Status: OK
- Execution options:
  - Don't stop fieldbus on PLC stop (only set outputs to 0)
  - Execute peripheral operations immediately (Experimental)
  - Show TwinCAT SFCs as FCS
- Port Number (as defined in the Twincat System): 301
- Control SFC Number (additional Ports): 1000
- FB "GetDeviceIdentification" number: 1001
- FB "AdtRead" number: 1002
- FB "AdtWrite" number: 1003

**Load configuration from TwinCAT System Manager:**

Ready to apply the symbol table onto a task or import an other symbol file

**Existing IO-Tasks:**

ID-Task	Taskname
301	IBH

**Content of symbol table:**

Address	Symbol	Comment
I 0.1	LAMPEN	Lampen
FC 30	OPC-Datent...	Bedient d
DB 7	PB_DATA	PB DRUC
DB 9	PRESSBESCH	DATEN C
DB 121	PROG_ERP	Programm
DB 3	SEGAL_AUSR	7 SEGME
DB 6	SOLL_GEGH	SOLLVE
FB 53	STATION1	Station 1
FB 54	STATION2	Station 2
DB 11	STATUS_DA...	Status-De
Q 0.0	TASTER	Taster
FB 58	WARNLAMPE	Warnlamp
DB 8	WEGBAUGR	DATEN C
ED 57	ZUFIC CFEM	Zufuhr-af

**Product number S7-315 #1300**

**Product number S7-416 #1302**

## **SoftPLC S7**

- ▶ Windows® 10 support
- ▶ Access to the field bus (e.g. PROFIBUS-DP, PROFINET, EtherCAT, etc...) with field bus master cards from Hilscher and Beckhoff or with standard I/O boards.
- ▶ Direct access with S7 for Windows®, OPC Server, STEP 7 or DLL
- ▶ Online functions possible using ISO-on-TCP (RFC1006), Modbus TCP, IBHNet driver or PROFIBUS
- ▶ PLC-PLC communication with various Ethernet protocols
- ▶ CP 343/443 emulation
- ▶ I/O monitor
- ▶ Display the diagnostic buffer without programming tool
- ▶ For our OEM-Customers the company Hilscher Gesellschaft für Systemautomation mbH provides our PLC kernel on the netX 500 Chip
- ▶ For our OEM-Customers a Windows CE version is available
- ▶ Also available as a pure Simulation PLC

**Product number S5-943 #1204**

## **SoftPLC S5-943/S5-945**

**Product number S5-945 #1206**

The SoftPLC is also available as S5 version. Since the SoftPLC behaves like an original SIMATIC PLC, the programming tools S5 for Windows® and STEP 5 can be used. Access to the field bus (e.g. PROFIBUS-DP, PROFINET, EtherCAT, etc...) can be made with field bus master cards from Hilscher and Beckhoff or with standard I/O boards.

# S7/S5-Interfaces

## **USB-S7 Adapter MPI, DP, PPI #20218**

For S7-200, S7-300 oder S7-400

- ▶ Integrated LCD-Display shows the transmission rate and MPI/ DP address
- ▶ Membrane keypad for the adapter configuration
- ▶ Powered by the PC, no power supply necessary

[www.ibhsoftec.com/USB-S7-Adapter-C-Eng](http://www.ibhsoftec.com/USB-S7-Adapter-C-Eng)

## **IBH USB-S5-Adapter #20220**

- ▶ Driver for S5 for Windows® and STEP 5 from V7.16 included
- ▶ Powered by the PC, no power supply necessary

[www.ibhsoftec.com/IBH-USB-S5-Adapter-Eng](http://www.ibhsoftec.com/IBH-USB-S5-Adapter-Eng)

## **IBH S5-Current loop converter #2020**

- ▶ For a serial connection between a PLC and a S5-PLC
- ▶ Fits the following PLCs: 90U, 95U, 100U, 101U, 115U, 135U und 155U

[www.ibhsoftec.com/IBH-RS232-S5-Adapter-Eng](http://www.ibhsoftec.com/IBH-RS232-S5-Adapter-Eng)

## **Constant Current Adapter for the IBH S5-Current loop converter #2042, #2044, #2046, #2048**

- ▶ For PLCs, that are not supplying the loop current (2 x 20mA), the Constant Current Adaptor is required to establish a connection.

[www.ibhsofttec.com/S5-Interface-Eng](http://www.ibhsofttec.com/S5-Interface-Eng)

## **USB S5/S7 Prommer (Siemens) #2008**

- ▶ The USB S5/S7 Prommer works together with S5/S7 for Windows®, STEP 5 and STEP 7. 64 Bit Driver for S5/S7 for Windows® available

## **S7-CX315/317 SD**

**Product number CX315 #3022**

**Product number CX317 #3024**

**S7 compatible PLC for the complete  
Beckhoff CX8000 series**

The S7-CX SD cards turn an embedded PC of the Beckhoff CX8000 series into a S7 compatible PLC and allow the use of the reliable and flexible Beckhoff hardware.

- ▶ Including S7 for Windows® (Kit-Version)
- ▶ STEP7 compatible
- ▶ Full retentivity
- ▶ Ethernet CP
- ▶ EtherCAT
- ▶ Web server
- ▶ Modbus TCP Master / Slave

The S7-CX315 SD / S7-CX317 SD can be used with the complete CX8000 series. Next to EtherCAT, the fieldbus systems PROFIBUS, CANopen, RS232/RS485, PROFINET RT, EtherNet/IP and Sercos III are directly available on the device.
